

invention. Moreover, prior art showing non-thermal reactor with these features, or the method of forming the non-thermal reactor, would be material to, and should properly be considered in examining all Groups, regardless of where such art is found within the classification scheme of the Patent Office.

Efficiency, both on the part of Applicants, and also on the part of the Patent Office, mandates that, where the claims have common distinctive features such as here, all claims should be examined together. The Restriction Requirement unduly burdens Applicants by requiring them to file and prosecute multiple applications, and pay fees and maintain multiple patents, to obtain the patent protection to which they are entitled.

Therefore, it is respectfully requested that the Restriction Requirement be withdrawn, and that all claims of Group I and Group II be considered in the present application.

The Commissioner is hereby authorized to charge any fees associated with this communication to Deposit Account No. 50-0831.

Respectfully submitted,

Douglas D. Fekete
